

MOUNT YOUR TAG

- Mount the *E-ZPass* Tag with the label facing you and the arrows pointing up. Place the Tag in the upper portion of the windshield at least one inch to the right of the center support of the rearview mirror and at least one inch below the tinted section of the windshield.
- Do not hold the Tag or place the Tag on the dashboard while traveling through an *E-ZPass* lane or under a gantry. Holding your Tag is unsafe and may cause your Tag not to read which may result in violations and administrative fees up to \$100 per occurrence.
- If you need additional adhesive strips for mounting your Tag, access your account at **e-zpassNY.com**.
